

Australian Aesthetic Devices presents:

XenLED
PHOTOTHERAPY

Australian Designed from the ground up

The Xen LED Phototherapy system utilises 3rd generation LED technology to combine 410nm, 633nm and 830nm on one panel while keeping treatment intensities that outperforms all rivals.

New "Chip on Board" (COB) LED technology allows the Xen LED to pack 10500 diodes into one 5 panel array.

With 3500 diodes per colour on the Xen LED array, treatment times can be dramatically reduced due to faster energy delivery.

Equipped with the Optimised Flat Distribution (OFD), energy is distributed evenly over the targeted area.

The benefits of Xen

- 3rd Generation LED Technology
- Tri-Coloured Array
- Half your treatment time
- Even Energy Distribution
- Balanced Hydraulic Arm

Results that speak

Delivering to client expectations is the ultimate goal, so we personally designed equipment that delivers on the promises you make to your clients. Our products create a safe profit-generating income stream for your business with results that will keep clients coming back.

Specifications

Light Source	Tri-Coloured COB LED Array			
Wavelength	Blue	410 +/-5nm	Red	633 +/-5nm
	IR	830 +/-5nm		
Number of Diodes	10500 diodes per System			
	3500 diodes per Wavelength			
Intensity-Planar	410nm 20-65 mW/cm ²			
	633nm 42-140 mW/cm ²			
	830nm 32-105 mW/cm ²			
Class	Class 1/B type			
Dimensions	Body (mm): 600(L) x 655(W) x 1300(H)			
	Head (mm): 450(L) x 300(W)			
Weight	60kg			
Power Requirement	240V 50 Hz			
Power Consumption	400VA			
Classification	Optical Risk Group 3 to AS/NZS IEC 62471.2:2012			
	Used for Cosmetic purposes only			

Industry Experience

With unmatched knowledge & experience in the Aesthetic industry covering Clinical & Practical technology applications as well as marketing & clinic management, Australian Aesthetic Devices can offer you the support you only dreamed about. Make the move into new technology safely & with confidence with the support of Australian Aesthetic Devices.

Dedicated Support

Our dedicated staff provides professional support, which helps to grow your practice and create the edge you need to be profitable in this competitive industry. Delivering a profit generating income stream for your business with results that will keep clients coming back.
